

Qingcheng Zhao

✉ qc.zhao@mail.utoronto.ca · ☎ (+1) 416-837-1026 · 🔍 Google Scholar

🎓 EDUCATION

University of Toronto, Toronto, Canada Sep. 2025 – Nov. 2030(Expected)

Ph.D. in Computer Science.

Advisors: Prof. Karan Singh

ShanghaiTech University, Shanghai, China Sep. 2021 – Jun. 2025

Bachelor of Engineering in Computer Science.

Advisors: Prof. Jingyi Yu and Prof. Lan Xu

University of California Berkeley, California, United States of America Aug. 2023 – Dec. 2023

Exchange Student in College of Engineering, University Of California Berkeley

📖 PUBLICATIONS

- Media2Face: Co-speech Facial Animation Generation With Multi-Modality Guidance **SIGGRAPH 2024**
*Qingcheng Zhao**, Pengyu Long*, Qixuan Zhang, Dafei Qin, Han Liang, Longwen Zhang, Yingliang Zhang, Jingyi Yu, Lan Xu
- DEPR: Depth Guided Single-view Scene Reconstruction with Instance-level Diffusion Priors **ICCV 2025**
*Qingcheng Zhao**, Xiang Zhang*, Zeyuan Chen, Yuan Gao, Zhuowen Tu
- Generating 3D Hair Strands from Images with Arbitrary Styles and Viewpoints **ACM Multimedia 2025**
Pengyu Long, Zijun Zhao, Min Ouyang, Qingcheng Zhao, Qixuan Zhang, Wei Yang, Lan Xu, Jingyi Yu

🔬 RESEARCH EXPERIENCE

University of Toronto Aug. 2025 - Present

PhD Student. Advised by Prof. Karan Singh

- Working on real-time audio-driven 3D facial animation generation.
- Exploring novel generative models for high-fidelity 4D face reconstruction from multiple views.

MiHoYo (HoYoVerse) May. 2025 - Aug. 2025

Research Intern.

- Proposed a novel approach for garment generation from multi-view images via UV-based representations.

ShanghaiTech University Mar. 2022 - May. 2025

Research Assistant. Advised by Prof. Jingyi Yu and Prof. Lan Xu

- Proposed a diffusion model in latent motion space for co-speech facial animation generation, accepting rich multi-modality guidance.
- Designed a novel approach for 3D hair strand generation from diverse image inputs across styles, viewpoints, and quantities of input views.

University of California San Diego Jul. 2024 - Nov. 2024

Visiting Scholar. Advised by Prof. Zhuowen Tu

- Proposed a novel depth-guided framework for single-view scene reconstruction that leverages instance-level diffusion priors

INDUSTRY EXPERIENCE

Nvidia Corporation Shanghai, China

Feb. 2024 – Jun. 2024

Software Development Engineer (Internship)

- Built a LLM-powered agent for gameplay with human-like behaviors in most popular games, using a text-based game UI descriptor to interact with LLM.

Deemos Technologies Inc. Shanghai, China

Nov. 2022 – Feb. 2024

Intern Researcher

- Built a real-time 3D interactive avatar system utilizing audio-driven facial expression animation technologies at Global AI developer Conference 2023.
- Built a web application for ChatAvatar project based on DreamFace, which can generate 3D avatars from a single image or text prompt.

ACTIVITIES

CSC108: Introduction to Computer Programming

2025 Fall

Classroom TA, Assisted in Q&A, invigilating exams and grading assignments

GeekPie Association

Sep. 2021 - Sep. 2024

President of GeekPie Association, Led ShanghaiTech's largest developer community.

CS100: Introduction to Programming

2023, 2024

Senior Teaching Assistant, Assisted in course design and led weekly recitation sessions.

HONORS AND AWARDS

Outstanding Graduates of Shanghai, Shanghai

2025

ShanghaiTech International Exchange Program First-Class Scholarship, ShanghaiTech University

2024

Outstanding Teaching Assistant, SIST, ShanghaiTech University

2023

Merit Student(top 2%), ShanghaiTech University

2022

Outstanding Officer, ShanghaiTech Student Union

2022

Bronze Medal, Award on The 2021 China Collegiate Programming Contest, Harbin Site

2021

One-hundred Fourth Place, Award on The 2021 ICPC Asia-East Continent Final Contest

2021

PATENTS

- **Image processing method and device, electronic equipment and storage medium** **CN116017167A**

Inventors: Kuang Cong, Hongyang Lin, Qingcheng Zhao, Lan Xu, Yichi Zhang, Hong Wu

Developed a novel image processing method leveraging layered lighting systems to enhance scene realism in virtual environments. This method integrates virtual lighting systems for high fidelity rendering.

SERVICE

- **Reviewer:** SIGGRAPH 2025

SKILLS

- Programming Languages: Python > C/C++ >= Javascript == Typescript > Ruby > MATLAB
- Tools: PyTorch, Blender, OpenCV, Git, L^AT_EX, Docker, Vue, React, FastAPI, Node.js, Rancher, Kubernetes,
